control

premier spa has the most sophisticated scheduling system available - making double bookings and appointment errors yesterdays headache. The built in point of sale system automates your stock control and tracks packages, courses and gift vouchers in one seamless process and client records are updated with ever transaction that the client makes.

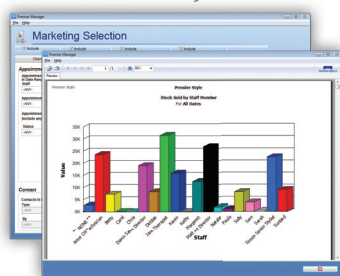

simple

Client relationship management is vital in today's competitive marketplace. Building long term relationships with your clients can only serve to improve their loyalty to you. Up to date information gives you the power to make your mailshots more targeted and to maximise your levels of customer care. The automated reporting within premier spa enables you to focus on your clients rather than on your paperwork.

power

premier spa is totally configurable with your business requirements - every aspect of the system can be customised to suit your exact needs. From the types of treatments you offer, to all of the retail and stock analysis you require, premier spa will accommodate your business demands.

“Premier spa is able to tell us a client's entire history, from what they've had done in the past to the bookings they have lined up. We can run any kind of report including one that shows us who our top ten clients are. This information is valuable in building customer loyalty. Finally, staff work on a commission basis and so we measure performance quite closely. premier spa can show us hours worked, clients they have seen and the revenue they have brought in.”

Karen Moulton, Manager Aveda - **Urban Therapy**
