We mainly attract business people and life is usually very fast paced and can be quite frenetic. In the past, we probably wouldn't have known when a client last came to see us, whereas with Premier Style we can pull off that information easily meaning we know a lot more about our clients, including how much they spend with us.

Ronni Schrevel, Manager - Trevor Sorbie

CONTROL

Premier Style has the most sophisticated scheduling system available - links between appointments are created at the touch of a button. The built in point of sale system automates your stock control whilst client records are updated with every transaction that the client makes.

SIMPLE

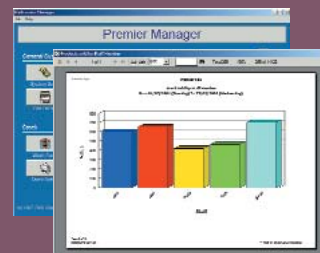

Client relationship management is vital in today's competitive marketplace. Building long term relationships with your clients can only serve to improve their loyalty to you. Up to date information gives you the power to make your mailshots more targeted and to maximise your levels of customer care.

The automated reporting within Premier Style enables you to focus on your clients rather than on your paperwork.

POWER

Premier Style is totally configurable with your business requirements - every aspect of the system can be customised to suit your exact needs. From the types of services you offer, to all of the retail and stock analysis you require, Premier Style will accommodate your business demands.
